How much surface area can I cover with a jar of DANIEL SMITH Watercolor Ground?

Beyond Paint · https://danielsmith.com/it/docs/how-much-surface-area-can-i-cover-with-a-jar-of-daniel-smith-watercolor-ground/

A. For Titanium White, Mars Black or Buff Titanium - applied with 2mm thickness (about the thickness of a nickel):
   - One 4 oz jar covers approximately 10 square feet
   - One 16 oz jar covers approximately 41 square feet

B. For Pearlescent White, Iridescent Gold or Transparent - applied with 2mm thickness:
   - One 4 oz jar covers approximately 7 square feet

   Example: A sheet of 22”x30” watercolor paper is 4.5 square feet, so a 4oz jar of (A) should cover 2 sheets; (B) should cover 1.5 sheets.
